

Tilia platyphyllos 'Pyramidalis Aurea'

Height	15-20 m
Crown	oval, half-open crown
Bark and branches	grey
Leaf	yellow, yellow
Flowers	cream white, flowers in June, fragrant flowers
Fruits	green, grey
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, peaty soil, all soil types
Paving	tolerates partial paving
Winter hardiness zone	4 (-34,4 to -28,9 °C)
Wind resistance	good, susceptible to sea wind
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, valuable for butterflies
Application	avenues and broad streets, parks, squares, cemeteries, large gardens
Shape	clearstem tree, feathered tree

Large tree with an oval crown, 15 to 20 m. The branches grow steeply upwards. Initially the crown is columnar but eventually becomes oval. Young twigs are green and brownish red on the sunny side. The leaf emerges bright yellow, turning fresh greenish-yellow later in the summer. The underside is covered with soft grey-white hair. The flowers are in pendent corymbs and open in June and early July. They are cream-coloured, very fragrant and attract many bees. This ancient German cultivar spent a long time forgotten. Suitable for parks, avenues, streets and squares.
