

## Ulmus 'Homestead'

<b>Height</b>	15-20 m, fast growing
<b>Crown</b>	oval, half-open crown
<b>Bark and branches</b>	brown
<b>Leaf</b>	green
<b>Autumn colour</b>	yellow
<b>Flowers</b>	brownviolet, flowers in March
<b>Fruits</b>	brown
<b>Spines/thorns</b>	None
<b>Toxicity</b>	usually not toxic to people, (large) pets and livestock
<b>Soil type</b>	loamy soil, sandy soil, peaty soil, calcareous soil
<b>Soil moisture</b>	suitable for wet soil, withstand short flood
<b>Paving</b>	tolerates paving
<b>Winter hardiness zone</b>	5 (-28,8 to -23,4 °C)
<b>Wind resistance</b>	good
<b>Other resistances</b>	resistant to frost (WH 1 - 6), can withstand wind
<b>Application</b>	avenues and broad streets, parks, squares, cemeteries, industrial areas, large gardens, windbreaks
<b>Shape</b>	clearstem tree

Large, vigorously growing tree, to approx. 16 m. Pyramidal to oval crown, but because the branches droop somewhat when older, the tree is eventually quite wide. Year-old twigs are brown-green and older bark is brown and slightly grooved. Its relatively large, glossy dark green leaf turns yellow in autumn. 'Homestead' was developed by the U.S. National Arboretum in Washington as a result of complex crossbreeding. It has a good to very good resistance to Dutch elm disease and fungal infections. It is hardy and can be used in industrial areas. Not suitable for narrow spaces.
